

System Technology, Inc's Case Shaker is an automatic system designed to settle and produce a uniform distribution of bulk fill product and allow for efficient compaction of a case in minimum time. The case shaker is fully adjustable to settle and compact a wide range of cases and can be fully integrated into any system. Mild or 304 stainless steel offers a sanitary heavy duty design for a rugged and sturdy build and is ideal for food applications as well as bread and bakery products, frozen foods, pharmaceuticals, powder and granule items, fasteners, and weigh & filing systems.

CASE SHAKER
