

System Technology, Inc's Automatic Pallet Dispenser is an auto-loading dispenser that can be loaded to run an entire shift unattended. Multi-directional output can effectively streamline your palletizing operation and save space with a compact and simple design. Able to dispense a wide range of pallets (CHEP, wood, plastic, etc.), the pallets can be loaded short-end or long-end first for convenience and will auto center to maintain organization and presentation. Customization is an option and we offer a full line of pallet conveyors to compliment your Pallet Dispenser.
